

Updates on State Route 37 Improvements (Segment A)

Location Map

Project Description:

The Long Lead project proposes to reconstruct State Route (SR) 37 to address Sea Level Rise (SLR) and recurring flooding while including Complete Streets features to address multi-modal bicycle and pedestrian use.

Purpose and Need:

The purpose of this project is to address recurring flooding and future SLR impacts to the existing SR 37 in Marin County. Flooding on SR 37 occurs during seasonal rain and high tide events, causing delays and

closures. Over time, the existing road could erode and get inundated permanently, resulting in the loss of a safe, reliable transportation corridor.

Project Funding:

\$10M: Environmental Phase (PA&ED) allocated in June 2019

Status:

Started the environmental phase of the project. Initiate the geotechnical and survey work, and interim flood protection alternatives.

Completed Near Term Improvements:
