

Transit and Intercity Rail Capital Improvements Program (TIRCP) 2020
Award for
Solano Regional Transit Improvements

This comprehensive effort will involve improving the access, reliability, frequency, integration, and safety of regional transit services throughout and outside Solano County. Five project components were funded in this application. Each component is fully scalable and has various elements of travel integrated into its proposal. Every component of the application is fully integrated to the local transit and active transportation system, with the goal of better integrating to the regional transit system as well. STA seeks to better improve the integration of each of these travel elements into a seamless, safe, and frequent regional transit system.

Total Application Award is currently \$10.4M
