

State Route 37 & Fairgrounds Drive

Interchange Improvements Project

Project Description

-  Widen Fairgrounds Drive to include additional northbound through and right turn lanes
-  Reconstruct the State Route 37/Fairgrounds Drive Interchange into a Diverging Diamond (DDI) Configuration
-  Improve pedestrian and bicycle access by providing continuous Class II bicycle lanes and pedestrian facilities throughout the length of the project
-  Construction is ready and cost for Construction & Construction Management is \$27M

Purpose and Need

-  Relieve existing and forecasted congestion and improve traffic operations on local roadway network for approved redevelopment and planned land use in the area
-  Improve safety for all modes of transportation - especially for pedestrians, bicycles, and scooters
-  Improve mobility equity for Disadvantaged Community population
-  Provide improved access to large attractions such as Six Flags and the future Solano 360 development, as well as local and regional bus service to the workplaces of the San Francisco Bay Area, Napa County, and Vallejo
